--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 3754

1. Claims 27-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 27 and 30, line 2, a second fluid control system is claimed although no first control system has been set forth.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9, 12-18, 33, and 36-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Credle, Jr.

Credle, Jr. shows a nozzle 88; soda inlet 82 connected to a soda source; syrup inlet 84; syrup source 16, 18 or 20; piston 40; piston chamber having soda section 48 and 50 and syrup section 44 and 46; second piston 42; soda drive control 92, 94 comprising first and second inlet and outlet valves; demand regulators 96 and 98 also being first and second syrup inlet and outlet valves; and the on/off control is inherent.

4. Claims 10, 11, 34 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3754

5. Claims 27-30 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. Claims 1-8, 19-26, 31 and 32 are allowed.
7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents cited in the original patent will be made of record in this application.
